

**NATIONAL
BARLEY
IMPROVEMENT
COMMITTEE**

OBJECTIVES

- A. Serve as a national forum for discussion of matters important to barley research, production and utilization.
- B. Serve in an information distribution capacity to all persons interested in barley.
- C. Identify national and regional priorities and encourage their adoption and proper funding.
- D. Serve in an advisory capacity as is appropriate to national or regional groups.

STRUCTURE: The NBIC consists of members from various regions and at-large categories. The number of representatives per region was determined on the basis of barley acreage per region. Barley workers from each region elect their own representatives. Representatives from the at-large categories may either be elected or appointed by the particular category involved. The NBIC may recognize a particular organization as representative of an at-large category and ask that organization to elect or appoint a representative to the NBIC.
